COURSE OF STUDY

IOWA SCHOOLS

Issued by the Department of Public Instruction

JOHN F. RIGGS

Superintendent of Public Instruction

PREFACE

The Hand-Book first issued in 1895 and revised in 1900 has proved most useful to rural teachers and its value to the rural schools has been widely recognized. In the third edition here presented a careful revision has been made bringing the work up to date and, as we think, greatly improving the text of former editions. The principal changes made are as follows:

The change from three main divisions of the course and the school to four divisions. Many schools have found it difficult to organize on the three grade plan.

The text covering the work in Writing is entirely new.

The work in Arithmetic is shortened and simplified in the lower grades.

The work in Artitmette is shortened and samplated in several lower grades.

The number of studies has been reduced in several of the years where the schedule seemed to be full.

The work in Language and Nature Study for the primary divisions has been taken out of the body of the course and put in the form of Outlines by themselves. As printed before, it seemed to cumber the course, and the work for the different

months did not always correspond to the work in the other branches as printed for the same grade.

The outlines and suggestions for teaching Vocal Music are

entirely new.

The entire course for advanced and village schools is rearranged and made out for nine months instead of eight.

Appropriate and helpful exercises in the Primary Division are suggested under the term "Hand-Work. This is in line with the trend of courses toward elementary manual training.

The effects of Stimulants and Narcotics will be found fully treated for lower grades under the general topic "Nature Study," see sub-topic "Hygiene and Behavior."

The work under "Nature Study" also contains very much material for "Elementary Agriculture."

JOHN F. RIGGS.

Superintendent of Public Instruction. April 2, 1906.

INTRODUCTION

AIMS. The aims of this course of study are:

1. To provide a plain, simple and progressive outline for the guidance of teachers, so that pupils may do systematic work and thus derive from public schools the best possible practical preparation for after life.

2. To reduce to a minimum the waste of time, money and effort caused by frequent change of teachers, poor classification and blind, aimless or unplanned work.

3. To arrange the work of the common schools by months so that teachers and pupils may have a definite standard of progress—may know when they have completed the course or any portion of it.

4. To afford young teachers all the help and encouragement possible by means of suggestions and directions which summarize the best current educational theory and practice.

5. To unify the work of the common schools of the state and to secure more effective supervision by furnishing a common basis as to the branches taught, and tests for promotion and graduation.

and graduation.

6. To enlist the interest and sympathy of parents and school officers and to secure their hearty co-operation, by making them better acquainted with what pupils and teachers are striving to accomplish in the schools.

Higher Course. To aid pupils who desire to pursue their studies beyond the common branches, and to furnish a suitable course for advanced rural schools and the smaller graded schools, an additional course of two years nas been prepared.

Records. Teachers should keep a record of the advancement of their classes in the work of the course. In this way officers and patrons of the school can easily determine the progress of pupils, and reports may be made to parents or guardians. A statement should be prepared, showing what years have been finished and how much work, by months or terms, has been done in years not completed. This statement, together with a program of daily recitations, should be left for the benefit of the next teacher.

All rural schools are now supplied with classification reg-

All rural schools are now supplied with classification reg-

If properly kept, these registers are a valuable aid to a systematic and progressive use of the course of study. At the close of the term of school, the classification register and course of study should be returned to the director or secretary of the board. At the beginning of the term, the teacher should secure possession of these records before organizing the school.

School Libraries. A good library ought to be considered a necessary part of the equipment of every school, rural or graded. Teachers should be alive to this great need of our common schools. In order to secure the best result, books for supplementary reading, for reference and for home use are essential. The pupil must acquire the power to get thought from the printed page easily in order to make satisfactory progress in his study of the text-books. His reading should be systematic; he should read only the best books, and the teacher should assist and direct him in this work. The list of books for the different years given in this course will, it is hoped, be very helpful and suggestive to teachers and school officers.

Supervision. However excellent a course of study, it can-

Supervision. However excellent a course of study, it cannot execute its own provisions. Neither can it be used with a fair degree of success unless the teacher is familiar with its details. In its use the best results can be secured only by close and watchful supervision on the part of the county superintendent. The normal institute affords an excellent opportunity to give teachers instruction in the course of study and its use, and this study should have an important place on every institute program. Some county superintendents secure excellent results by requiring teachers to take an examination on the course of study.

Most of the difficulties encountered in following this course of study are caused by the irregular attendance of pupils, by the inexperience of teachers, and by the frequent change of teachers. These facts render it all the more necessary that county superintendents should instruct young teachers how to use the Hand-Book most effectively. It is an axiom of common sense that well-planned, systematic school work is far superior to aimless, haphazard work.

SUGGESTIONS TO TEACHERS

1. Classification of Pupils. In the rural schools where all the eight years' work must be done by one teacher, and where pupils are of all ages from five to twenty-one, the organization and arrangement of classes must be given very careful thought, or the number of classes will be so great that good, thorough work is impossible. The pupils should be arranged in four divisions—primary, first intermediate, second intermediate and advanced. Reading serves as the most convenient basis for classification.

1. The Primary Division includes the first two years of the course. All pupils in the first and the second readers are placed in this division.

in this division.

2. The First Intermediate Division is composed of the third and fourth years, and includes all pupils in the third reader. The Second Intermediato Division is composed of the fifth and sixth years, and includes all pupils in the fourth reader.

3. The Advanced Division should include two years' work—seventh and eighth. Most of the fifth reador pupils will be electrical in this division.

seventh and eighth. Mos classified in this division.

classified in this division.

II. Sub-Divisions and Classes. Of course it is not possible for the teacher to organize classes in each study and each year of the entire course. In fact, very few rural schools will have pupils representing all of the eight years. The outline of the course of study provides for five sub-divisions, as follows:

(1) First-Primary; (2) Second-Primary; (3) First-Interme-

diate; (4) Second-Intermediate; (5) Advanced. In the winter term, the First-Primary will usually contain only a few pupils, and may not be represented at all, while the Advanced Division will be large. In the summer months, this condition will be reversed.

Classes should not be formed for one or two pupils unless it would be absolute injustice to put them into classes already organized. Too much dependence must not be placed upon the classification of the preceding teacher, for the graduation of pupils will need constant change and readjustment. On the first day of the term a temporary classification should be made. Within a few days, after carefully considering the case of each pupil, his age, natural ability, and attainments, a term classification should be made, placing each pupil where he can accomplish the best results. Worthy pupils should be promoted when they are able to do the work of the next higher class. Make such promotions an incentive to do good work. While it is desirable that a pupil shall recite in the same division in all his studies, yet this is not essential.

Some pupils in every rural school are very uneven in their

his studies, yet this is not essential.

Some pupils in every rural school are very uneven in their studies, and must be allowed to recite in the class or division where they can derive the greatest good.

Such pupils may be permitted to recite in one branch in the second-intermediate division and in some other branches they may recite in the advanced division. But teachers should try to keep the classification of the school as uniform as possible. In the smaller schools the number of classes should not exceed twenty including general exercises. In the larger schools, where all the five subdivisions are represented, the classes and recitations necessary will be about as follows:

Reading—5 or 6 classes; nine recitations daily.

Spelling—3 classes; three recitations daily.

Writing and Drawing—General class.

WRITING AND DRAWING—General class.

MUSIC—2 divisions; one exercise daily.

NUMBERS—2 classes; two recitations daily.

LANGUAGE AND LITERATURE—1 or 2 classes; one recitation

daily.

NATURE STUDY—2 classes; two recitations daily.

daily.

NATURE STUDY—2 classes; two recitations daily.

GEOGRAPHY—2 or 3 classes; two recitations daily.

GRAMMAR—2 classes; two recitations daily.

PHYSIOLOGY—1 class; one recitation daily.

HISTORY—1 class; one recitation daily.

ARTHHMETIC—3 or 4 classes; three recitations daily.

GENERAL LESSONS—1 exercise.

III. DAILY PROGRAM. Attention is called to the two sample programs given at the close of this section. The one for four divisions is an exact copy of the winter term program of Miss Jennie Gonzales for a rural school in Cerro Gordo county. The sample program for first division illustrates one of the greatest difficulties that confronts the teacher of a large rural school. The numbers of recitations is so great that the time for each class is too short to permit good work. The teacher's problem is to reduce the number of classes. This may be done by combining classes, by having certain classes recite only on alternate days, or by selecting some advanced pupil to assist the teacher in the oversight of the primary classes. These two programs do not profess to be perfect. They are simply suggestive. It is conceded that a program must be flexible and adapted to the school in which it is used. Such adaptation must be left very largely to the judgment of the teacher.

The daily program should be in a conspicuous place in the school room, and as much attention given to its provisions for seat work as for recitations. It should be closely followed, and changed only on proof that revision is desirable. Pupils should be familiar not only with the program, but also with the course of study. In the use of the course, teachers will find it very helpful, both to pupils and to themselves, to interest pupils in the provisions of the course, and to help them to understand it and be guided by it.

The amount of time given to any one class must be determined by the importance of the subject, the number in the class,

The amount of time given to any one class must be determined by the importance of the subject, the number in the class, and the time at the teacher's disposal. Classes should be so arranged that the same pupils do not come in consecutive recita-

The teachers should study how to provide and conduct daily opening exercises that are interesting and instructive. To maintain interest in these exercises they should be varied. A good

school journal will be of much assistance in suggesting variety.

At the close of the term a copy of the program should be left in the classification register for the benefit of the next

IV. Examinations and Graduation. When pupils have completed the work of any year, they should be given a written review or examination on their work. The "Tests for Promotion" are intended to be a guide as to what the pupil should know when he has completed the work of a division. When pupils complete the course, they should have a thorough examination on the branches studied. This examination should be under the direction of the county superintendent, and all who pass this test should receive a common school diploma. A good time for these examinations is at the close of the winter term. Teachers, parents and school officers should encourage, in every way, pupils to complete this common school course, for fully one half of the children of our state receive no higher or better cducation than that furnished by our rural schools.

V. Outlines of Special Subjects.—Immediately after the work of the eighth year the teacher will find "Outlines in Special Subjects." These outlines include Drawing, Music, Language, When pupils have EXAMINATIONS AND GRADUATION.

Nature Study, and Handwork. Teachers should consult these outlines daily and adapt them to the needs of the school. They will be found especially helpful in planning seat work for the primary classes. Much of the language work can be used in the second year and the exercises under "Handwork" are the best kind of elementary manual training. The kind of language work suggested in the outlines is a necessary preparation for the study of grammar. The outlines in Nature Study include oral lessons in Physiology and Hygiene, and if these lessons are properly taught, they will fully meet the requirements of the law in regard to instruction in the effects of stimulants and narcotics.

VI. How to Use this Course of Study. It is not intended that this course of study shall in any way fetter the teacher's freedom or individuality. This course does not attempt to convert the rural schools into city schools. It does not propose a rigid graded system, nor does it imply that it is to be strictly and literally followed in any school. Surely some judgment, tact, and common sense should be expected of teachers and such teach

ers will willingly give this course of study a fair trial and will carefully study its provisions and suggestions. It should be studied carefully as a whole, then each year's work should be studied by itself. Next the work for the term or month should be carefully planned. Only in this way can any teacher correlate the work in the different branches or assign lessons intelligently. The entire course for each year, each month and each branch of the work in the different branches or assign lessons intelligently. The entire course for each year, each month and each branch of the course has its general aims, but the teacher in assigning lessons must have specific and definite aims or pupils are all "at sea" in their study and preparation. Every lesson if taught effectively must be taught with reference to the lessons that both precede and follow it. This, the course of study will enable the teachers to do. Thus our school work will be more definite, more symmetrical, and the progress of our pupils more satisfactory. Let teachers consult the course in making their daily preparation. Only by earnest systematic work can we make the schools of our state equal to the demands of the Twentieth Century.

COURSE OF STUDY

PRIMARY DIVISION

FIRST YEAR

1. BOOKS AND MATERIALS USED.

First readers, slate and pencil or tablet and lead-pencil, sponge, ruler. Pencils of all kinds should be large and long and should be kept well sharpened. Encourage each pupil to make a collection of good pictures and to start a little cabinet of pretty shells, pebbles, etc. Plenty of drawing material. A pair of small scissors. Cardboard and pretty colored paper.

2. STUDIES.

READING AND LANGUAGE. Chart and first reader, supplemented by easy myths, legends and stories. Three recitations daily.

SPELLING. Words in reading lessons.
WRITING. Letter forms and easy sentences.
NATURE STUDY. Animals and plants.
HANDWORK AND DRAWING. Objects, colors, simple forms,

ANDWORK AND PROVINCE

AND SIMPLE SOURCE

MUSIC. Simple songs only.

Numbers. Combinations to 6 using objects, with constant drill in estimating, comparing and measuring lines, surfaces, volumes, forces, values, weights and time. Problems involving addition, subtraction, multiplication and division.

SECOND YEAR

1. BOOKS AND MATERIALS NEEDED.

Second reader, tablets and pencils, ruler, drawing material, scissors, cardboard, practice paper for writing, colored pencils box of paints, materials for handwork.

READING AND LANGUAGE. Second readers and supplementary work. Three recitations daily.

SPELLING. New words in reader and other lessons. Punctuation. Abbreviation. Dictation exercises.

WRITING. Review small letters. Capitals. Copying. Practice movements.

tice movements.

NATURE STUDY. Plants, animals, forces. Oral lessons in Geography, Hygiene, and Behavior. See outlines.

HANDWORK AND DRAWING. Follow outlines, adapting them

HANDWORK AND DRAWING. Follow outlines, adapting them to the needs of your school.

MUSIC. Singing by note. Intervals on the staff. Rhythm and the cultivation of soft and pleasant tones.

NUMBERS. Read and write numbers to 100. Addition table completed. Subtraction within the tables orally.

Multiplication table to 5 times 9. Division within the tables. Easy comparisons and measurements. Fractions, taught in connection with the common weights and measures. Easy problems. Written work Written work.

FIRST INTERMEDIATE DIVISION

THIRD YEAR

1. BOOKS AND MATERIALS NEEDED.

Third reader, pen, ink, blotters and paper for practice, ruler, drawing material, tablet and elementary arithmetic and a music reader.

2. STUDIES.

Reading. About three-fifths of the Third Reader with one-half of an additional reader or equivalent supplementary work. Choice selections committed to memory. Much sight reading. Two or three good books from the school library read under the supervision of the teacher. Two recitations daily.

Spelling. Words in reader and other lessons. Careful attention given to homonyms and synonyms. Easy word analysis.

WRITING AND DRAWING. Write with pen and ink. Free movement. All written work neatly done. Alternate with drawing, if necessary. Drawing as outlined, and in connection with all lessons.

with all lessons.

Language and Literature. Picture lessons and reproduction stories in connection with reading. Punctuation and capitals. Paragraphs. Correct use of words. Course of regular lessons similar to that of second year's work.

Nature Study and General Lessons. Systematic work in observation lessons, morals and manners, plants and animals, patriotism, hygiene and the effects of stimulants and narcotics, elementary physics and geography.

Music. Music Reader. Easy Songs. Work as outlined.

Arithmetic. Primary book in the hands of the pupil. Read and write numbers. Rapid addition and subtraction of numbers of three periods. Multiplication and division with multipliers and divisors under 12. Continue objective work with tables and the drills in fractions. the drills in fractions.

FIRST INTERMEDIATE DIVISION

FOURTH YEAR

1. BOOKS AND MATERIALS NEEDED.

Third Reader, elementary Arithmetic, first book in Geography, Music Reader, copy-book and practice paper, ruler, pen and ink, Spelling-Book and tablet, pencils and drawing material. In some schools a text-book in Language will be required, also an elementary book in Physiology.

2. STUDIES.

READING. Third Reader completed. Much supplementary reading. Use of dictionary. Two or three books from the school library read under the direction of the teacher. Two recitations

daily.

SPELLING. Words from all lessons. Use spelling-book.

WRITING AND DRAWING. Copy-book and much practice on free-arm movement. Writing letters. Drawing in connection with all studies may alternate with writing.

LANGUAGE AND LITERATURE. Reproduction and composition work. Picture stories. Parts of speech taught as to use. Classes of modifiers and use. The daily lessons of the children in other branches may be used as the basis of the language work. To learn how to use the mother tongue to express one's thoughts is the aim of language work.

To learn how to use the mother tongue to express one's thoughts is the aim of language work.

GEOGRAPHY AND NATURE STUDY. Systematic work in the text-book in geography, supplemented by lessons on plants, animals and minerals. Field lessons should be given, and all out door observations encouraged to the utmost. The teacher should have the Teacher's Manual of Frye's Geographies, Ginn & Co. Read stories of travel. The principal facts under elementary physiology including the effects of stimulants and narcotics should be taught as science lessons.

Music. There should be two divisions in music, reciting on alternate days, or one division should copy work while the other division sing.

division sing.

ARITHMETIC. Rapid work in the fundamental operations.

Original problems. Continue fractions. Long division. Denominate numbers. Decimals, and much drill in problems involving fractional parts of 100.

SECOND INTERMEDIATE DIVISION

FIFTH YEAR

1. BOOKS AND MATERIALS NEEDED.

Fourth reader, spelling-book, elementary arithmetic, elementary geography, music reader, copy-book and practice paper, ruler, pen and ink, tablets, pencils, and drawing material, language book, and pocket dictionary.

2. STUDIES.

Reading. About three-fifths of fourth reader with much supplementary work. Sight reading and choice selections memorized. Constant use of dictionary in preparing reading lessons. Two or three books from the school library read under the direction of the teacher. One recitation daily.

Spelling. Spelling-book and important words in all lessons. Word analysis of English words. Homonyms. Synonyms. Writing and Drawing. Copy-book. Practice on movement. Business forms and letters.

Business forms and letters.

Pictorial, botanical, geometric and decorative drawing encouraged in all lessons as a means of instruction and expression. See outlines.

LANGUAGE AND LITERATURE. Composition work, including LANGUAGE AND LITERATURE. Composition work, including reproduction, description, narration and letters, classes and uses of words, biography and stories, book reviews, and literature growing out of work in geography, reading and nature study.

GEOGRAPHY AND NATURE STUDY. Review of the grand divisions. North America, United States and Iowa studied particularly. Commercial geography emphasized. Science lessons.

MUSIC. Three lessons or more a week. See outlines and

music reader.

ARITHMETIC. Review exercises. Factors, multiples, and fractions. Decimals. Denominate numbers. Simple measurafractions. Decimals. Denotion. Business transactions.

SECOND INTERMEDIATE DIVISION

SIXTH YEAR

1. BOOKS AND MATERIALS NEEDED.

Fourth Reader, dictionary, spelling book, complete geography, language book, complete arithmetic, elementary physiology, copybook and practice paper, pen, ink, ruler, pencils, tablets and drawing materials.

2. STUDIES.

READING. Last part of fourth reader with supplementary reading from another fourth reader, a science reader, a geographical reader, easy English classics, or first book in United

graphical reader, easy English classics, or first book in United States history.

Spelling. Spelling bock, and new words in all lessons. Study of prefixes and suffixes. Dictionary work.

Writing and Drawing. Continue Palmer's Method of Business Writing. Free-arm movement and much practice on business forms. Care in all written work. Drawing as a means of expression and illustration. Alternate with writing.

Language and Literature. The parts of speech, their classes, modifications and uses. Analysis of easy sentences. Most time given to composition work. Study of easy English and American classics. Books from the library read under the direction of the teacher.

Geography. Complete book begun. Careful study of the

Geography. Complete book begun. Careful study of the geography of Iowa. Study of the continents. An elementary history should be read in connection with the study of North America.

MUSIC. Reader and songs. ARITHMETIC. Complete the book as far as Ratio or Per-

ADVANCED DIVISION

SEVENTH YEAR

1. BOOKS AND MATERIALS NEEDED.

Fifth reader, spelling-book, complete arithmetic, grammar, geography, history, physiology, dictionary, pen and ink, paper, tablets and drawing materials.

2. STUDIES.

READING AND LITERATURE. Fifth Reader first-half or choice

Selections from standard authors.

Orothography. All new and difficult words in lessons.

Derivation of words. Dictionary work. Dictation exercises. Spelling book.

Grammar. Elementary book completed. Composition work throughout the year.

Geography. Study the United States and Europe.

Physiology. An elementary book. The effects of stimu-

lants and narcotics.

ARITHMETIC. Complete arithmetic to square root.

HISTORY. To 1844. The controversy over slavery in the territories.

MUSIC AND DRAWING. Instruction must be in connection with other grades or only incidental, as separate classes cannot be formed in these studies for all the different divisions in a rural school.

ADVANCED DIVISION

EIGHTH YEAR

1. BOOKS AND MATERIALS NEEDED.

Fifth reader, English and American classics, dictionary, arithmetic, history, geography, grammar, spelling-book, pen, ink pencils, tablets and drawing materials.

2. STUDIES.

READING AND LITERATURE. Fifth Reader complete. English and American classics.

ORTHOGRAPHY. Same as seventh year. GRAMMAR. Complete the book. Composition work through-

Out the year.

GEOGRAPHY. Study South America, Asia, Africa and Australia. Review important topics.

PHYSIOLOGY. Advanced book. Subject completed.

ARITHMETIC. Square root, cube root, mensuration and review of most difficult problems.

Hereny, The toyt beek should be completed by the middle

of most difficult problems.

HISTORY. The text-book should be completed by the middle of the year. One month or more may be given to review of important topics, and three months devoted to civil government.

CIVIL GOVERNMENT. Local, state, and national.

DRAWING. Continue to use this study as a means of grasping clear ideas and expressing them. Every lesson in history, geography, physiology and arithmetic offers abundant opportunities for illustrative work. for illustrative work.

ADVANCED COURSE OF STUDY FOR VILLAGE SCHOOLS

This course is intended for advanced rural schools and for small graded schools. In many rural schools a part of this work, say one or two studies, can be pursued to advantage during the winter months at least.

The first year of this course is the ninth year in school, and the second year is the tenth year in school.

FIRST YEAR

Grammar and Composition (6 months). Rhetoric (3 months).
Arithmetic and Bookkeeping (9 months).
Physics (6 months).
Botany (3 months).
General History (9 months).
Review Study or General Lesson.

SECOND YEAR

Rhetoric (3 months). Rhetoric (3 months).

American classics (3 months).

English Classics (3 months).

Algebra (9 months).

Botany (3 months).

Physiology 6 months).

United States History (6 months).

Civil Government (3 months).

Review Study or General Lesson.
